Indonesia Defense Magazine

EDITOR IN CHIEF
Irawan Ronodipuro

This first issue of **Indonesia Defense Magazine** introduces the Indonesian public to the many faces of our national defense industry, while the English-language version extends a channel of communication to military and diplomatic counterparts in Indonesia and around the world.

We socialize the general Indonesian public with developments and potential of national defense companies, while introducing our national Army, Navy and Air Force personnel to governments and counterparts abroad.

Our defense industry has been imbued with the spirit of *Alutsista*, the Indonesian-language abbreviation for *Alat Utama Sistem Senjata Tentara Nasional Indonesia*, translated as "Armaments and Munitions for the Indonesian National Armed Forces". The mission of our new magazine is thus to convey vital information about these entities and their developments to the general public at home and to specialists abroad.

The Republic of Indonesia is today faced with the need to augment self-reliance in its defense, cooperating with foreign counterparts without becoming dependent on their (sometimes uncertain) goodwill. This has become painfully clear with the sudden imposition of "sanctions" on military hardware and spares we have suffered in past years.

As countries like Indonesia truly need to learn to defend themselves, with or without the coverage of foreign alliances, the development of a domestic defense industry goes hand-in-hand with the rise of a mass industrial (and export-oriented) base. The fact is that "foreign defense aid" inevitably comes with strings attached; thus, today an independent industrial base of defense industries is being championed by the Government of Indonesia.

A vast archipelagic nation, Indonesia is faced with defending vast land and marine borders; we must also recognize a dynamic of economic and military power shifting in the New Millennium to Asia; there is an urgent need to examine and re-align alliances and commitments.

We intend to improve military relationships, starting with military attaches in embassies and trade missions in Indonesia, helping them to access any relevant data they might find useful in their duties.

The new Minister of Defense, General Prabowo Subianto, has held bilateral talks with military counterparts in countries of Asia, Africa and Europe. The Minister has reportedly visited a number of countries to confer with ministers of defense and other relevant authorities, explicitly aiming to improve military relationships and upgrade communications between the Republic of Indonesia and foreign militaries.

As a medium to facilitate communications about developments in Indonesia's defense industry, **Indonesia Defense Magazine** proposes to stand as a nexus to information and data-sharing. This monthly publication will feature the latest advances in domestic defense production, changes in personnel and news from the Indonesian Government and military.

We look forward to your input and support.

Irawan Ronodipuro, Editor in chief

PERHATIAN PRESIDEN JOKOWI TERHADAP PENGUATAN INDUSTRI PERTAHANAN

Presiden Joko Widodo sebagai Presiden ke-7 Indonesia mulai menjabat sejak 20 Oktober 2014. Pria kelahiran Surakarta, Jawa Tengah, 21 Juni 1961 ini terpilih bersama Wakil Presiden Muhammad Jusuf Kalla dalam Pemilu Presiden 2014 dan kembali terpilih bersama Wakil Presiden Ma'ruf Amin dalam Pemilu Serentak 2019.

Presiden Jokowi memberikan perhatian besar terhadap penguatan industri pertahanan yang menjadi visinya. Jokowi mengemukakan, sebagai negara kepulauan terbesar di dunia yang terdiri dari 17 ribu pulau, terletak di antara 2 samudera dan 2 benua, Indonesia harus mampu menjadi sebuah kekuatan regional yang baik yang disegani di kawasan Asia Timur. Jokowi menekankan pada penguatan industri pertahanan dalam negeri. "Karena itu, kita perlu melakukan penguatan pertahanan kita dengan alutsista yang modern yang bersandar pada kemampuan industri alat pertahanan di dalam negeri," katanya saat menyampaikan pengantar pada Rapat Ter-
