Dear Readers,

First of all, on behalf of the editors at the Indonesia Defense Magazine (IDM), we take this opportunity to wish all our authors, subscribers, readers, experts and staff of the editorial team a Very Happy New Year 2022!

Welcome to this, our thirteenth issue of the publication, and the first issue of 2022. We would like to acknowledge the interest and support of our many readers around the world, as well as our sponsors in various sectors of the defense industry, private and state owned enterprise (BUMN), to arouse interest in exports as well as fulfilling domestic defense needs.

The IDM editorial team has been extremely busy, covering interviews, gathering reports and historical material for this January issue.

One of the most appreciated sections of IDM is its coverage of historical events, and in this issue we present a story of the Battle of the Arafura Sea in 1962, presented by Commodore TNI Supardi, Head of the Naval History Office.

As we take a look at Armada Day at a glance, the Indonesian Navy, TNI AL, the nation's guardian of the sea, celebrated its 76th anniversary, "Armada Day," last month on December 5th 2021. This is covered in an article written by Septiawan, titled "Recognizing the Role of the 'Guardian of the Sea' in Defending the Nation's Sovereignty."

Air Force Chief of Staff cherishes a vision of becoming a well-respected air force in the region. Air Force Staff and Command College (Seskoau) as an educational institution takes part in pursuing the vision. An interview with Seskoau Commander Air Vice Marshal TNI Widyargo Ikoputra points out how Seskoau actualize this vision by preparing capable, excellent and professional human capital, especially mid-ranking Indonesian Air Force officers.

In this edition we are deeply honored to interview Ambassador of the Russian Federation, H.E. Lyudmilla G. Vorobyoya, Ambassador of the Russian Federation to ASEAN, H.E. Alexander Ivanov, and the Russian Defense Attache to the Embassy of the Russian Federation to Indonesia, Capt.(Navy) Sergey Zhevnovatyy, in which we are able to understand the reasoning why Russia is pursuing a strong cooperation with ASEAN, its response to current geopolitical dynamics and its long-established friendship with Indonesia.

The production of the fifth Fast Attack Craft (FAC) (KCR-60M), produced by the state-owned defense industry shipbuilder, PT. PAL Indonesia, continues the government efforts to strengthen the Indonesian Navy capabilities to defend maritime sovereignty and cherishes a self-reliant defense industry.

Director General for Defense Strategy of Defense Minister Maj. Gen. TNI Rodon Pedrason shares his opinion on various defense challenges should be anticipated in 2022 and comes up with conducting defense diplomacy as one of ways to overcome them.

Looking abroad, global dynamics remain to attract 'major players' such as the United States, China and Russia. Secretary of State Antony Blinken used his first official visit to Southeast Asia, particularly in Indonesia, to emphasize the U.S commitment to a free and open Indo-Pacific. Meanwhile, Russia and China have further strengthened bilateral relations as a result of 'pressure' from the West and AUKUS.

As always we look forward to any feedback and suggestions of our readers around the world. May this New Year 2022 be a prosperous and extraordinary one!

Have an enjoyable and educational read, dear friends.

Editor-in-Chief

TNI DALAM OPERASI MILITER SELAIN PERANG (OMSP)

TUGAS KEMANUSIAAN SERDADU PERTAHANAN

Prajurit Korps Marinir (Kormar) TNI AL membantu membersihkan sisa-sisa abu vulkanik akibat erupsi Gunung Semeru, Kabupaten Lumajang, Jawa Timur, Kamis (09/12/2021).

“Peningkatan kesiapsiagaan satuan TNI untuk tugas Operasi Militer Perang (OMP) dan Operasi Militer Selain Perang (OMSP),”

Panglima TNI Jenderal Andika Perkasa.

DINAS PENERANGAN KORPS MARINIR

Seiring dinamika ancaman, para personel Tentara Nasional Indonesia (TNI) tidak hanya akan dihadapkan pada ancaman pertempuran senjata di medan perang. Bencana alam, gerakan separatis bersenjata, aksi terorisme hingga sengketa perbatasan juga menjadi bagian tugas pokok yang harus ditunaikan. Dalam Undang-Undang (UU) RI Nomor 34 Tahun 2004 tentang TNI, para prajurit pertahanan Indonesia disebut memiliki tugas pokok untuk melindungi kedaulatan dan keutuhan negara melalui Operasi Militer Perang (OMP) dan Operasi Militer Selain Perang (OMSP).

OMSP berarti menggunakan kemampuan militer dalam lingkup operasi militer di bawah batas perang. Pada dasarnya, OMSP tetap dilakukan untuk kepentingan pertahanan negara dan/atau dalam rangka mendukung kepentingan nasional sesuai dengan peraturan perundang-undangan. Tak berbeda dengan OMP, kesiapsiagaan sepanjang waktu sudah menjadi kewajiban sekaligus tuntutan bagi seorang prajurit dalam melaksanakan tugas OMSP. Mereka harus siap dilibatkan dalam setiap operasi, kapan pun dan di mana pun atas perintah Mabes TNI.

OMSP dilaksanakan dalam bermacam bentuk untuk melengkapi unsur-unsur kekuatan nasional yang dititikberatkan pada pencegahan terjadinya perang, penyelesaian konflik, memelihara perdamaian, dan mendukung pemerintah dalam menanggulangi krisis lokal. Di masa damai, saat ancaman militer belum terjadi, tugas TNI dalam OMSP justru terlihat lebih menonjol yakni, menjaga stabilitas nasional dan tugas kemanusiaan (*civic mission*). **(NHN/YAS)**

TNI IN MILITARY OPERATIONS OTHER THAN WAR (MOOTW)

HUMANITARIAN DUTIES OF INDONESIAN SOLDIERS

"The improvement of TNI's readiness for Combat Operations and Military Operations Other Than War (MOOTW),"
TNI's Commander-in-Chief General Andika Perkasa.

Indonesian Armed Forces (TNI) personnel are not only faced with threats of warfare but also natural disasters, armed separatist movements, terrorism and border disputes, all of which become part of their primary duties amid the changing nature of military threats. Indonesian Law No. 34/2004 on TNI states that Indonesian soldiers' main responsibility is to protect the sovereignty and integrity of the nation through Combat Operations and Military Operations Other Than War (MOOTW).

MOOTW refers to operations that include the use of military capabilities within the range of military operations short of war. It is applied in the interest of national defense and/or the country's interests, according to law. Similar to combat operations, constant preparedness in MOOTW is mandatory and obligatory for soldiers carrying out their duties. They have to be ready round-the-clock to join any operations at any time and place as ordered by TNI Headquarters.

The many forms of MOOTW are conducted to complement the elements of national power, focusing on war prevention, conflict resolution, peacekeeping and supporting the Government in defusing local crises. In peacetime, when a military threat has yet to take place, TNI's MOOTW tasks, such as maintaining national stability and performing humanitarian duties (civic action) become more prominent. **(NHN/YAS)**
